

# Joe Westwell | CV

Email: [westwellWork@gmail.com](mailto:westwellWork@gmail.com)

## Personal summary

Graduate software developer seeking an opportunity to break into the industry, I am looking to grow as part of a team and to continue to learn and improve my skills. Outside of my bachelors degree I have completed supplemental programming bootcamps, certifications and more.

## Skills

In depth knowledge of front-end web technologies: React, JavaScript, HTML, CSS.

Experience with back-end web technologies: Node.JS, MongoDB, Express.

Experience with Python, Java and C++.

Experience of working in a team environment: patient, understanding and enjoy helping others. Practised during the bootcamps with team projects involving stand-up meetings and kanban boards.

Ability to work and learn on my own in a planned and structured manner. Demonstrated by achieving the highest grade possible on my degree and diploma and by completing a variety of additional learning activities.

## Projects

Please see my Portfolio: <https://j-wll.github.io/portfolio/>

## Education

### **BSc (Honours) Software Development - UCEN Manchester** *September 2023 - May 2024*

Top-up degree continuing on from the HND. From UCEN Manchester, validated by Manchester Metropolitan University. During my time on this course I studied fullstack web development and systems programming, creating a variety of projects demonstrating skills in these fields. I did my dissertation on organisational software for developers. This applied a developmental methodology, researching the topic to create a program. I acted as Student Representative during the latter half of this course.

### **Computing HND - University of Bolton** *September 2021 - May 2023*

A 2 year Higher National Diploma which I completed with a distinction and an award for the highest academic achievement. The diploma covered a wide range of topics including programming, networking, cybersecurity, user interface design, computer system architecture and more; providing a wide range of supplemental knowledge for a programming role. Additionally I acted as a Student Representative during the course.

**Google IT support** *July 2021 - September 2021*

Google certified Coursera programme containing supplemental skills to programming such as computer networking, IT security, technical support, and more.

**Digital people** *April 2021 - July 2021*

Coding bootcamp with Hive Manchester focused on python. I gained valuable experience and knowledge from a Cisco job mentorship alongside both individual and team projects.

**Codenation** *March 2021*

Codenation's 3 week develop coding bootcamp, learning the fundamentals of Python, HTML and CSS. Worked on group projects, with the need to meet deadlines and keep ourselves accountable, mimicking a work environment and providing valuable experience. This bootcamp deeply strengthened my interest in the field, prompting me to get a robust education for it.

## Supplementary Qualifications

[Digital People Certificate of Completion \(From Hive Manchester\).](#)

[Level 2 Certificate in IT User Skills \(Open Systems and Enterprise\) \(ITQ\).](#)

[Technical support fundamentals certificate \(Google IT Support Coursera course\).](#)
